English – B2

Some projects

TODOs

Web application that allows you to organize your tasks so that you can keep track of the tasks you have done and the ones you haven't.

Stack used: React.js, HTML, CSS

Chat

Chat App with an authentication module.

There are too many libraries involved in this project which are: **ky** as an alternative to plain fetch, **Formik** and **Yup** for form validation, **React Router** for simple route management, **pusher** for WebSockets, **Laravel Echo** as a frontend-end event listener.

Stack used: as frontend React.js and as backend Laravel.

URLShortener

A web app URL shortener or reducer link in order to make it easy to remember.

Stack used: as frontend React.js and as backend Laravel.

Rick and Morty

Informational web page that fetches data from The Rick and Morty API.

Stack used: Vanilla JavaScript, CSS and HTML

TODOS(Vue3)

The same logic was done with react version, but in this case, I built an API with Laravel and Vue as frontend.

Stack used: as frontend Vue3 and as backend Laravel.

Training

Computer Science (2018-2022)

National Engineering University of Nicaragua

Web Bootcamp(2022)

At Nerdify Nicaragua

Baccalaureate (2013-2017)

República de Argentina
